DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 1 and 6-35 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2-36 of copending Application No. 10/158,592. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious for one of ordinary skill in the art at the time of the invention to utilize any magnetic sensor system in the current application other than solid state magnetic sensor system since it merely depends on the system configuration and the availability of the sensor system.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 6-9, 14, 20-26, 34, 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blonder et al (US Patent No. 5,834,709).

Consider claim 1, 14, 15. Blonder teaches a passive stylus system for a computer comprising at least one permanent magnet (22), a magnetic sensor system (sensor array X and Y) for determining the location of the magnet, and an electronic appliance for receiving the input from the magnetic sensor system for cursor control data (see column 3 line 10 to column 4 line 57). Blonder further teaches that it is known to utilize solid state magnetic field sensor in conventional position sensing devices (column 1 lines 39-59). Therefore, it would have been obvious for one of ordinary skill in the art at the time of the invention to utilize any magnetic sensor system readily available in the market including solid state magnetic sensor system in the device of Blonder so as to simplify the design and cost of the system.

Consider claims 6-7. The system of Blonder utilize the X, Y magnetic sensors to determine the location of the stylus magnet relative to the origin of the X, Y coordinate (Fig.2).

Consider claim 8. Blonde teaches to detect the position of the stylus in the z-direction (column 3 lines 40-47).

Consider claim 9. Blonde teaches to detect whether the tip or the opposite end of stylus is being used so as to generate different input signal for the computer system (column 3 lines 48-64).

With respect to claims 20-26, 34, and 35, see the rejection above.

Response to Arguments

4. Applicant's arguments with respect to claims 1, 6-9, 14, 20-26, 34, 35 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
